

Extensions for VS Code

Bracket Pair Colorizer 2

CoenraadS | 591,443 installs | (55) | Free

A customizable extension for colorizing matching brackets

Install

[Trouble Installing?](#)

With this VS Code extension, you can color code the matching pairs to help ease that pain point and work on the making the code itself work — not the editor.

Browser Preview

Preview

Kenneth Achenberg |  139,695 installs |  (27) | Free

A real browser preview inside your editor that you can debug.

Install

[Trouble Installing?](#) 

Browser Preview helps limit the amount you need to do this by giving you a solid preview of your work inside VS Code itself in a new Chrome process.

Prettier - Code formatter

Esben Petersen |  5,000,116 installs |      (162) | Free

Code formatter using prettier

Install

[Trouble Installing?](#) 

The description describes Prettier as an “opinionated code formatter, it enforces a consistent style by parsing your code and re-printing it with its own rules that take maximum line length into account, wrapping code when necessary.”

gitlink

[Qinen Zhu](#) |  17,622 installs |  (9) | Free

Goto/Copy current file's online link, supports multiple remote sources in GitHub/GitLab/BitBucket/VSTS/DevOps

Install

[Trouble Installing?](#) 

We like gitlink because of its simplicity. While there are plenty of Git extensions out there, one of the things about gitlink is that it's simple and does just one thing. And it does it well. Just highlight a snippet of code, and gitlink will then take you to the online repo for that particular snippet. It is incredibly useful to quickly *Go To* your repo no matter where it's hosted remotely.

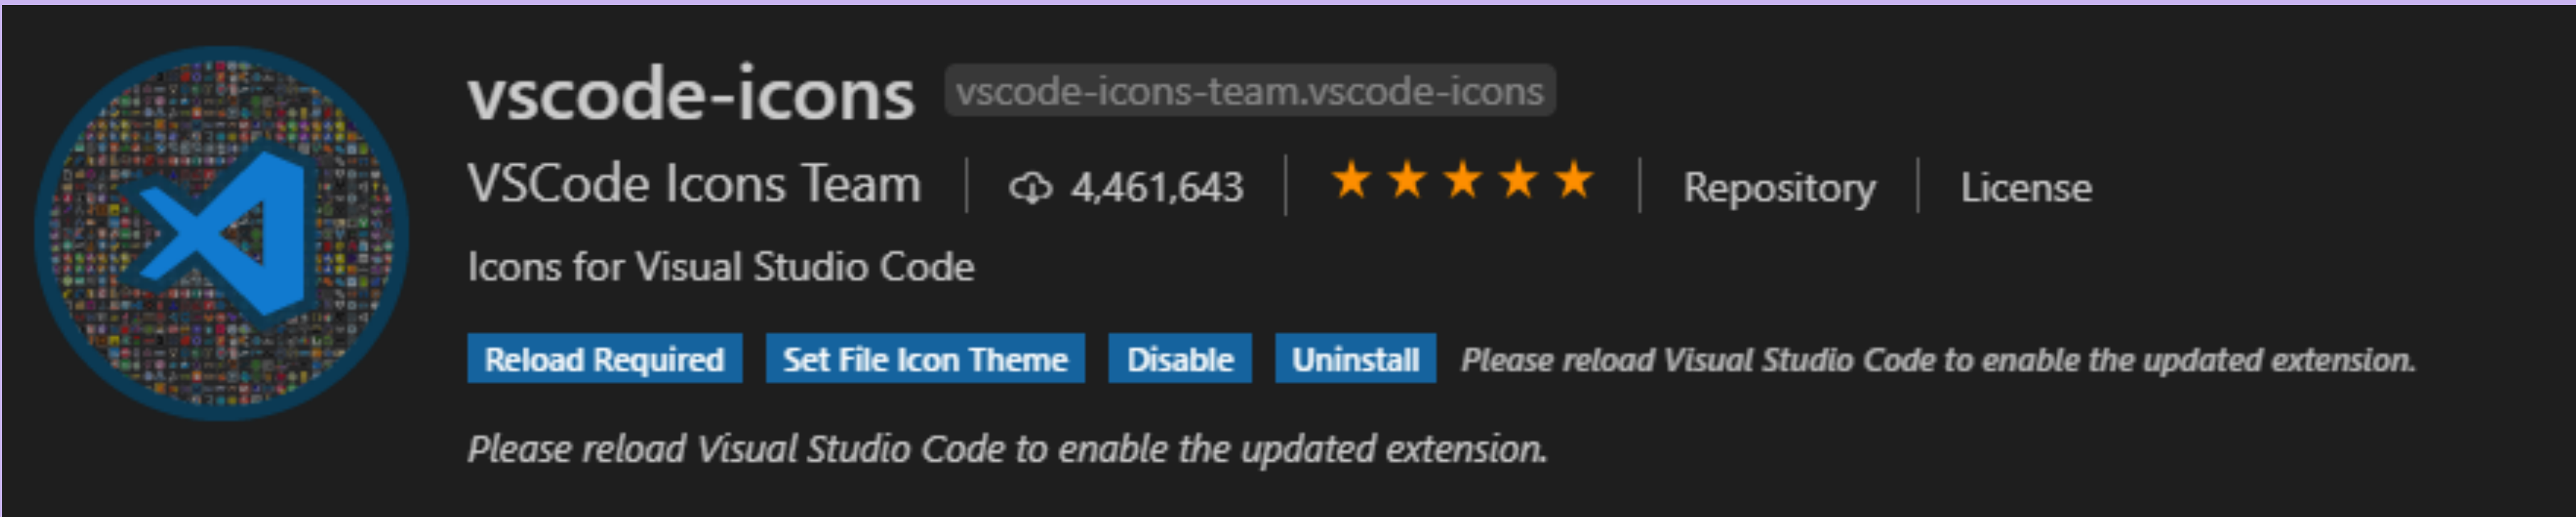

Better Comments

Aaron Bond |  611,259 installs |  (67) | Free

Improve your code commenting by annotating with alert, informational, TODOs, and more!

[Install](#) [Trouble Installing?](#) 

It is one of those VS Code Extensions that everyone needs because it will, if you believe the name, let you leave *better comments* in your code. With shortcuts that let you differentiate between questions, exclamations, commented-out code, queries, alerts, highlights, and TODOs, this extension will not only make your life easier, it will make your team’s life easier.

With VS Code Icons, the editor becomes a bit more colourful and easier to navigate. The file system is skinned with icons representing various file types, and these show up in the explorer as well as the document tabs themselves. It makes working your way through complicated file systems much easier and less of a headache.

Auto Close Tag

Jun Han |  2,361,853 installs |      (67) | Free

Automatically add HTML/XML close tag, same as Visual Studio IDE or Sublime Text

Install

[Trouble Installing?](#) 

Auto Close Tag has made our lives easier. So we want to make yours easier. It's simple and easy and you can keep typing between them and simply keystroke your way to the next line or to the end of that one. Install this and give your fingers a break from the gymnastics of closing tags manually.

colorize

kamikillerto |  86,719 installs |  (13) | Free

A vscode extension to help visualize css colors in files.

Install

[Trouble Installing?](#) 

This extension helps alleviate that by providing a visual note for any color codes you use inside your files. You can see the colors that you’re using inside the text itself as a highlight so that you don’t have to constantly be swapping back and forth from swatches and color selectors and so on.

Live Server

Ritwick Dey |  3,947,498 installs |  (223) | Free

Launch a development local Server with live reload feature for static & dynamic pages

[Install](#) [Trouble Installing?](#)

Have you ever wanted to launch a local dev server from within your IDE and work on it in real-time? No matter how you answered that question, you will want to give Live Server a shot. Because that’s precisely what you can do with it. While it might not completely remove the need for products like Local by Flywheel and MAMP, it certainly cuts down on their necessity in many situations.

**Thank
You!**

Hope you find them useful.
